

SUSTAINABLE DEVELOPMENT GOALS

8 DECENT WORK AND ECONOMIC GROWTH
BEWI BOX and Pallet as a service generate revenue without harming the environment by reusing them

12 RESPONSIBLE CONSUMPTION AND PRODUCTION
The product features of the BEWI BOX and Pallet provide safe and good transport of goods, less foodwaste - no environmental impact

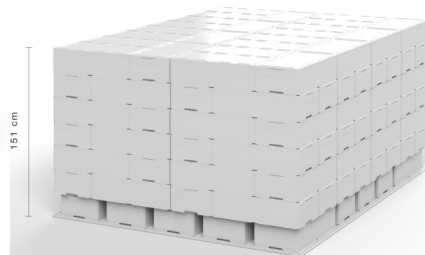

14 LIFE BELOW WATER
BEWI BOX and Pallet provides less waste and controlled collection of used packaging

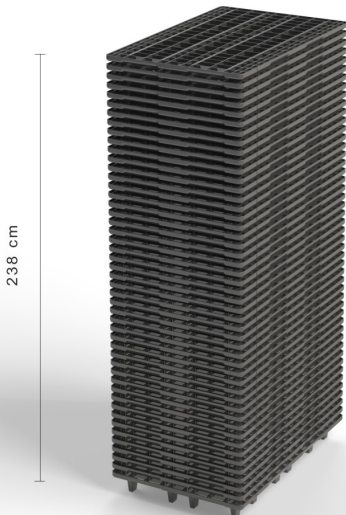

168 IPS boxes with Bewi pallets

161 IPS boxes without Bewi pallets

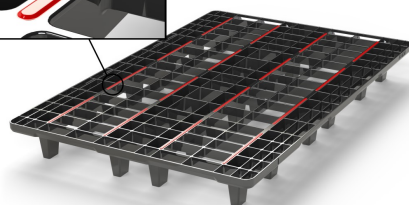

48 Bewi pallets

BEWI Pallet	Facts
Dimensions in cm / Weight	78,5x119,5x12 / 5,6 kg

Sustainability & Circular economy

- Reduced inbound shipping costs and CO2 footprint of pallets due to stackability and almost the double amount of pallets per truck
- Reduced PMC means less nr. of planes required - BEWI pallet provides an extra 175 kg per PMC (7 boxes of 25 Kg), reducing your CO2 footprint alone with approx. 5%
- Pallets designed for reusage with returnable packaging and pooling solutions. No need for landfill or burning of wooden pallets
- BEWI pallets recyclability and ability to be made from recycled materials will be attractive to users seeking to raise the perceived environmental friendliness of their operations

Commercial

- Warehouse – BEWI pallets requires less space (stackable) and saves time compared to wooden pallets through more efficient handling (pallet magazines)
- BEWI plastic pallet is adapted to PMC used for air cargo. About. 70% less time needed for preparing a PMC
- Reduce the truck and plane waiting time and increase the operating profit
- Reduce your shipping costs, as plastic is approx. 30% lighter than wood
- Forklift to unload reduce labour cost. Improved HSE (health, safety & environment) - Contributes to reverse the trend of the increasing workers' compensation and health care costs
- Purchase – BEWI pallets contains a deposit value enabling a competitive net price

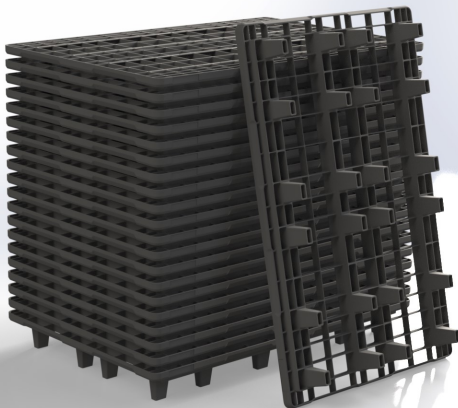

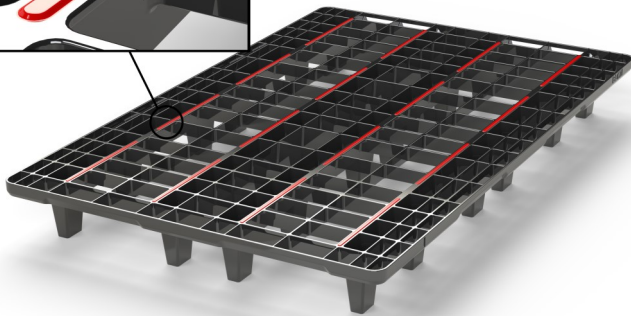

Quality

- Increased profit through reduced breakage - Truck will handle the loading and manually re-loading of boxes is not needed.
- Improved quality / coldness goods during transport; Conventional manual handling of EPS boxes involves lifting devices that opens the EPS deck for a few seconds allowing the gas from the dry ice to leak out
- Improved stability of the EPS boxes on the PMC
- Hygienic design. Pallets designed with round corners so no dirt gets stuck. No closed spaces in the pallet that can crack and gather bacteria

BEWi Pallet	Facts
Article number	#
Product name	BEWi Pallet
Dimensions in cm	78,5x119,5x12
Weight	5,6 kg
Material	Black PE
Recycled	Yes
Barcode	Yes
Building height when stacked.	5 cm
Recommended dynamic load	1000 kg
Recommended static load	1400 kg
Nr. of BEWi pallet spots in a 40 feet refrigerated container	23/24
Nr. of BEWi pallets in a truck with 33 pallet spots	1565
Block chain and traceability	Optional
Anti Skid Strips	Top
Entry	4 sides

The BEWi pallet - Characteristics

- Hygienic design. Designed with round corners so no dirt gets stuck. No closed spaces in the pallet that can crack and gather bacteria
- Bewi plastic pallets can be easily cleaned and washed for reuse, lending themselves to use with food, beverages, and other products where contamination must be minimized
- The low weight is spread on 24 pallet legs and the upper side include non-slip rails
- Stable and stackable - only 5 cm building height. I.e. reduced inbound freight costs per pallet and less internal storage space required
- Leaner - Efficient pallet flow with no manual lifting/turning of pallets. Usage of forklift/lifter (snile). Fewer back injuries, jammed fingers and feet -Less absence due to illness
- Customized to PMC cargo carrier for aircraft cargo - positioned directly on PMC
- No waste and 100% Recyclable for new pallets. BEWi pallets recyclability and ability to be made from recycled materials will be attractive to users seeking to raise the perceived environmental friendliness of their operations
- Bewi plastic pallets are a sustainable alternative that helps reduce CO2 emissions
- Example Fish - Compared to a wooden pallets of 20 kg, the lightweight BEWi plastic pallet allow approx. 320 kg more fish per 40 feet refrigerated container
